DETAILED ACTION

Summary

On June 16, 2004, an Office Action was sent to the Applicant rejecting claims 1-33. On December 17, 2004, the Applicant responded by amending claims 1-3, 9, 26-27, and 29-33.

Claim Objections

The objection has been withdrawn,

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-3, 6-26, and 28-33 are rejected under 35 U.S.C. 102(e) as being anticipated by Erlanger (US 2003/0055778), as set forth in the previous Office Action.

With regard to the claim amendments, Erlanger discloses receiving an inbound communication from a debtor of a lender in a manner sufficient to identify a referer identity corresponding to the lender (p.5, 59-66 and p.6, 99-100) and providing the lender with call activity reporting (p.6, 99-100).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 4-5 and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Erlanger in view of Katz (US 2002/0055906), as set forth in the previous Office Action.

Response to Arguments

Applicant's arguments filed December 17, 2004 have been fully considered but they are not persuasive. The Applicant argues that Erlanger does not disclose a referrer identity or a debtor of a lender in connection with the referrer identity. In

Art Unit: 3624

response, Erlanger discloses that a single entity may take on one or more roles, including lender, loan pool trader, application processor, loan processor, and loan seeker (p.5, 59-66). Erlanger further discloses that each loan solicitation can be received directly from a loan seeker or indirectly through an entity that acts as an application processor for the loan seeker and that a record is kept in netbacking database of whether an application processor is used, and if so, who the application processor is (p.6, 99-100). The Examiner is interpreting this disclosure as being a debtor of a lender in connection with the referrer identity and a referrer identity; therefore, the Examiner is interpreting Erlanger as reading onto the invention substantially as claimed.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3624

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
